

Product Information

ActiGuard

DESCRIPTION

Blend of surfactants and vegetable oils that inhibit water absorption and swelling of reactive clays.

FEATURES AND BENEFITS

ACTIGUARD is added on an as-needed basis, but there is evidence that it can act as a general mud conditioner, as well as a shale inhibitor. Consequently, it may be desirable to incorporate some ACTIGUARD in the mud regardless of the reactivity of the formations being drilled.

RECOMMENDED TREATMENT

Typical concentrations for optimum performance are 0.1% to 0.5% by volume.

HANDLING

For specific precautions and handling see MSDS information.

AVAILABILITY

ActiGuard is packaged in 18.9 L pails and is available from HiTech Fluid Systems Ltd.
