

Product Information

ActiVator II

DESCRIPTION

ActiVator II is a pH buffer and thermal stabilizer.

FEATURES AND BENEFITS

ActiVator II is most effective if dissolved in fresh water and added through a chemical barrel. Thermal stabilization can be evaluated by determining the low-shear-rate viscosity after hot rolling at a specific temperature.

RECOMMENDED TREATMENT

Recommended initial concentration for optimum performance is 5.7 kg/m³ and should be mixed after ActiVator I.

HANDLING

For specific precautions and handling see MSDS information.

AVAILABILITY

ActiVator II is packaged in 22.68 kg sacks and is available from HiTech Fluid Systems Ltd.
