

Product Information

ActiVator I

DESCRIPTION

Extremely hydrosopic filtrate reducer and thermal stabilizer.

FEATURES AND BENEFITS

ActiVator I can be added as a dry powder through a mud hopper or through a chemical barrel by dissolving in fresh water. Thermal stabilization is measured by determining the low-shear-rate viscosity at less than one rpm after hot rolling at a given temperature.

RECOMMENDED TREATMENT

Recommended initial concentration for optimum performance is 14.25 kg/m³.

HANDLING

For specific precautions and handling see MSDS information.

AVAILABILITY

ActiVator I is packaged in 22.68 kg sacks with an impervious inner membrane and is available from HiTech Fluid Systems Ltd.
