

Product Information

Defoamer A

GENERAL DESCRIPTION

Defoamer A is a specially blended alcohol based anti-foaming agent. Defoamer A is insoluble in water, but is readily dispersible.

RECOMMENDED TREATMENT

Defoamer A is an extremely effective defoamer designed for use in drilling fluid operations.

Defoamer A has proven very effective when low to extreme cases of foaming occurs in aqueous based fluids.

Defoamer A works in a variety of pH ranges and at high temperatures. Defoamer A is also effective in a wide salinity range.

TYPICAL PHYSICAL PROPERTIES

Appearance	red tinted liquid
Specific Gravity	0.79

HANDLING

Defoamer A is a controlled product using the WHMIS Classification.

Refer to MSDS information for specific precautions and handling.

AVAILABILITY

Defoamer A is available in 18.93L pails from HiTech Fluid Systems Ltd.
