

Product Information

Go-Devil II

DESCRIPTION

Go-Devil II is a blend of non-ionic polymers that provide low-shear-rate viscosity (LSRV) in the APHRON ICS™ system.

FEATURES AND BENEFITS

The LSRV created by GO-DEVIL II promotes optimal hole cleaning, solids suspension, formation invasion control and lost circulation prevention.

RECOMMENDED TREATMENT

Recommended initial concentration for optimum performance is 4-5 kg/m³.

HANDLING

For specific precautions and handling see MSDS information.

AVAILABILITY

Go-Devil II is packaged in 11.34 kg sacks and is available from HiTech Fluid Systems Ltd.
